

print over sticky paper and stick over or hard paper to create new special and colony tiles :)

LEAVITT STATION

Named after Henrietta Leavitt - deaf american astronomer. Her discovery of a way to accurately measure distances on an inter-galactic scale, paved the way for modern astronomy.

Pathfinders - fan made

IAPETUS

Iapetus is the third-largest satellite of Saturn. It is best known for its unusual features, such as a dramatic "two-tone" coloration and equatorial ridge running around the moon.
